PROFESSIONAL EXPERIENCE

Software Engineering Intern

Duke Manufacturing

May 2026 - Present, St. Louis, MO

- Developed automation software for a robotic frying system designed for fast-food restaurants.
- Built a from-scratch simulation platform using Claude Code for the robotic fryer using real-world data to model performance, evaluate product viability, and inform business decisions around potential deployments.
- Designed a Salesforce partner portal for sales representatives using Salesforce Experience Builder and custom Lightning Web Components to improve access to partner resources.
- Produced 4 sales analytics dashboards to visualize performance, identify trends, and enable data-driven decision making among stakeholders.
- Collaborated with an international scrum team of 15 software engineers using Agile methodologies and presented a practicum to company leaders, including the chairman and the president of the company, to demonstrate accomplishments.

Men's Basketball Analyst

Southern Illinois University Edwardsville

May 2025 - Present, Edwardsville, IL

- Collaborate with coaches to develop analytics strategies that improve team performance.
- Develop proprietary rating systems (D-Score) that analyze practice data, optimize strategy, and rate player performance from a scale of 1-10.
- Provided pregame reports for all 32 games of the season, using a program that generates reports with advanced stats and opponent vulnerabilities.
- Use machine learning to find opponents' strengths and weaknesses in order to maximize win potential and give actionable insights to the coaches.

IT Department Intern

Truck Centers, Inc.

May 2023 - August 2026, Troy, IL

- Assembled and installed technology equipment throughout corporate headquarters over three summers.
- Built 200+ employee computers (installed software, managed necessary hardware, registered new computers with corporate domain, etc.).
- Travelled throughout 6 different company locations to provide IT assistance to many branches around the midwest.

EDUCATION

Computer Science - University of Notre Dame

Minor in EG Corporate Practice • 2028 • 3.66

- College of Engineering
- London II (Summer 2025)

ADDITIONAL INVOLVEMENT

President of ND Men's basketball Analytics Club

University of Notre Dame • ND Men's basketball Analytics Club • August 2025 - Present

- Built a ML model to predict NCAA tournament games and build a bracket which correctly predicted 8 out of 16 upsets in the 2026 tournament.
- Planned and facilitated club meetings and developed semester long plans for the club.
- Instructed 10 members of the club learn how to use RStudio and code in the R language to produce data visualizations.

Selected Member of Transfer Portal Analytics Consulting Project

University of Notre Dame • Transfer Portal Analytics Consulting Project • March 2025 - Present

- Provided technical assistance for a Notre Dame Alumnus' startup, with the objective to predict which collegiate football athletes enter the transfer portal with an accuracy over 70%.
- Collaborated with a team of 3 students to build a predictive model that outputs a list of the top 300 college football players with the highest market demand and likelihood of entering the transfer portal, updating the list each week.
- Strategized with the entrepreneurs weekly, planning out modeling efforts and analyzing data to draw meaningful insights for their company.

Selected Member of St. Andre Committee

University of Notre Dame • St. Andre Committee • August 2025 - August 2026

- Organized events for 60 new students, in collaboration with 20 other St. Andre committee members.
- Provided assistance to 60 students and their parents on move in day, and checked students into their new dorm.
- Supported new students in their adjustment into college life and acted as a familiar leader throughout student's ease into their transition to college.
